Description :

Turpentine (Product Code: SCI-751/329) is a volatile, non-polar solvent oil used to dissolve waxes, resins, oils and paints in school and college solubility experiments. Listed as analytical reagent grade, it is packed in a 100 ml bottle and shipped with an MSDS, which makes it a practical choice for chemistry teachers building a set of contrasting solvents. Turpentine is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its range of chemistry consumables for laboratories.

Specifications

Parameter	Detail
Substance	Turpentine
Grade (as listed)	Analytical reagent
Volume	100 ml
Safety data	Supplied with MSDS
Shelf life	Shelf life depends on the chemical, its grade and storage conditions; ask us for the expiry date of the batch you are quoted.
Product code	SCI-751/329
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is Turpentine Used For?

Turpentine is traditionally distilled from pine resin, and its oily, non-polar character is what makes it useful in teaching. In a “like dissolves like” practical, students place small samples of candle wax, cooking oil, salt and sugar in test tubes of water, ethanol and turpentine, then record which solvent dissolves each one. Wax and oil dissolve in turpentine while the ionic and sugar samples do not, giving a clear, visual lesson on polarity.

It is also handy for cleaning oil-based paint, grease and wax residues from apparatus. Turpentine is flammable and its vapour is irritating, so keep it away from Bunsen flames, work in a ventilated room, use only a few millilitres per test tube and wear gloves and goggles. Return unused liquid to a labelled, tightly closed bottle.

Supplier

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, is an Ambala-based company that sources and supplies laboratory chemicals such as Turpentine for schools, colleges and dealers. Buying solvents together with test tubes, racks and safety wear from the same supplier keeps the paperwork for a practical in one place. Learn more about the company on the ScienceLab profile.
