Description :

Universal Tube Rack (Product Code: SLE/P/28) is an adjustable polypropylene rack used tohold laboratory tubes of different sizes upright in biology, chemistry and clinical teaching labs. Itholds up to 12 tubes of one size, anywhere from 16 to 30 mm in diameter, and each openingcloses around the tube with an iris turned by a knob. The rack is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and lab plasticware supplier in India,at its own factory in Ambala.

Specifications

Parameter	Detail
Material	Polypropylene
Capacity	Up to 12 tubes of the same size
Tube diameter range	16 to 30 mm
Tube volume range	15 mL to 50 mL tubes
Tube holding	Iris openings: turn the knob to open, or insert a tube directly into the opening
Tubes	Not included
Product code	SLE/P/28
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Universal Tube Rack Used For?

Most racks have fixed holes, so a lab needs a different rack for each tube size. This universal rack adapts instead: the iris in each opening closes around whatever tube is placed in it, from 15 mL up to 50 mL tubes. It suits labs that switch between culture tubes, sample tubes and centrifuge-style tubes during the week, and it saves bench space because one rack covers several sizes.

To load it, turn the knob to open the iris, drop the tube in and release, or simply push a tube straight into the opening. The listed capacity is up to 12 tubes when all are the same size. As a piece of school laboratory equipment it is also handy for teachers who prepare sample sets in different tube sizes for group work.

What to Specify When Ordering

- The diameter and volume of the tubes you will use (the rack takes 16 to 30 mm and 15 mL to 50 mL tubes).
- The number of racks needed per bench or per lab.
- Whether you also need tubes quoted, since tubes are not included with the rack.
