Description :

Microphone Wireless (Product Code: SCI-1319/08) is a handheld UHF wireless dynamic microphone used to carry a speaker's voice to a sound system in classrooms, halls, meeting rooms and stage events. Its hyper-cardioid pattern focuses on the voice in front of the microphone, and the cable-free transmitter set lets a teacher or presenter move around freely. Itis supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a school lab equipment supplier that can add it to a wider institutional order.

Key Details

Parameter	Detail
Transducer	Dynamic microphone
Style	Handheld
Communication	Wireless
Frequency type	UHF
Set type	Transmitter set
Polar pattern	Hyper-cardioid
Colour	Black
Typical uses	Karaoke, party, meeting, stage
Product code	SCI-1319/08
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Wireless Microphone Used For?

Schools and colleges use a wireless handheld microphone for morning assemblies, annual functions, seminars, quiz contests and lectures in large rooms, where a cable would restrict the speaker or trip people up. Offices use it for meetings and conferences, and event organisers for stage shows, parties and karaoke. Because it works on UHF, the microphone sends the voice signal over radio to its receiving equipment, which then feeds the amplifier or sound system.

For clear sound, hold the microphone a short distance from the mouth and point it straight at the speaker. The hyper-cardioid pattern rejects much of the sound coming from the sides, which helps reduce background noise and feedback, but it should still not be aimed at loudspeakers. Switch the transmitter off after use and store the microphone in a dry place.

What to Specify When Ordering

- How many handheld microphones you need and whether they will be used at the same time.
- Ask us to confirm exactly what the transmitter set includes before you order.
- The amplifier or sound system the microphone will be used with, so we can check the
