**Product Name :**

Solar Energy Kit

**Product Code :**

SCI-165/023

## Description :

### DESCRIPTION :-

- A comprehensive kit for investigating the properties of silicon photovoltaic (solar) cells as a source of useful power, in an interesting and practical manner.
- The kit comprises 8 individual 0.4V 100 mA cells.
- These may be accommodated in the base 'tray' which provides physical support and facilitates interconnection of the cells using the connector strips provided.
- The cells may be linked in a variety of series, parallel or series/parallel combinations to give desired output characteristics.
- Also included is a low consumption electric motor with mounting components, connecting leads and small fan to illustrate practical use to which the system can be put.
- Dimensions of base tray 110 x 95mm.
- One year warranty
