Product Name :

Gel Electrophoresis Apparatus

Product Code :

SCI-306/08

Description :

DESCRIPTION :-

- Fast 20 Minute Gel run
- Easy Gel Casting
- Electrophoresis tank for 6 gels
- 6 x Gel trays with Gel Caps and combs
- 6 x 40mL mini pipettes and tips
- The injection-molded UV transparent chamber is made from thick acrylic, making it durable and leak-proof while the lid fits securely in place and can easily be removed.
- All of Walter's electrophoresis units feature adjustable leveling feet, recessed electrical wires, and a safety stop that prevents the gel from running when the cover is not securely fitted.
- Each casting tray with embossed gel ruler has rubber end caps and multiple slots for easy and versatile comb placement.
- This unit requires 500mL of buffer and a power supply.
- The power supply is compatible with all Walter Products electrophoresis units.
- This power source can be used on 75V or 150V with a maximum current of 250 milliamps.
