Description :

Hand Lens (Product Code: SCL2329/036) is a handheld convex-lens magnifier used to produce an enlarged image of small specimens in school and college biology labs. Students reach for it first when examining leaf venation, flower parts or insect mouthparts, and its metallic body suits everyday handling in class. This hand lens magnifier for school labs in India and abroad is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Hand lens (magnifying glass)
Optical element	Convex lens that produces a magnified image of the object
Material	Metallic
Suitable for	Close observation of whole specimens in the lab, classroom and field
Product code	SCL2329/036
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Hand Lens Used For?

In botany practicals the lens is used to examine the parts of a flower (sepals, petals, stamens and carpels), the arrangement of seeds in a fruit, or the spore-bearing structures on the underside of a fern frond. Zoology classes use it to study insect legs, wings and antennae, while ecology field trips rely on it to identify mosses, lichens and small invertebrates on the spot. Alongside other plant biology lab equipment, it helps students decide which features are worth preparing as a slide for the microscope.

For a sharp image, hold the lens close to your eye and bring the specimen towards it until the detail comes into focus, rather than holding the lens at arm's length. Good side lighting makes surface texture much easier to see. Never look at the sun through the lens, and do not leave it lying in strong sunlight, because a convex lens concentrates light and can scorch paper or skin.

OEM Manufacturer

Jain Scientific Equipments Private Limited, which trades as ScienceLab, is the OEM (original equipment manufacturer) of this hand lens and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Because the lens comes straight from the factory that produces it rather than through a trader, schools, colleges, dealers and importers deal directly with the maker for class sets. For repeat orders or matching sets in later years, ask us and the enquiry is handled by the manufacturer itself. More about the company is on our company profile.
