Description :

Cork (Product Code: SCL299/049) is a size no. 0 plain rubber stopper used to close small tubes and narrow-mouthed vessels in school and college laboratories. It tapers from a 13 mm top diameter to a 9 mm bottom diameter, and although many labs call it a cork, the rubber grips glass more firmly than natural cork does. This rubber stopper for lab use in India is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Size	No. 0
Top diameter	13 mm
Bottom diameter	9 mm
Material	Rubber
Pattern	Plain
Use	Laboratory
Product code	SCL299/049
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Rubber Cork Used For?

A small stopper like this closes a tube while its contents are shaken, for example when mixing oil, water and Sudan III for the emulsion test for fats, or when keeping a sample from evaporating or picking up dust between lessons. It is also used to seal small tubes in fermentation and respiration demonstrations, and to store small quantities of solutions or specimens in narrow vials. It is one of the basic items when planning a biology lab setup for a school.

Choose the stopper by the inside diameter of the vessel's mouth: with a 9 mm base and 13 mm top, it suits openings whose inner diameter falls between those two figures, ideally so that around a third to half of the stopper sits inside the neck. Twist it in gently rather than pushing hard. Where a glass tube or thermometer must pass through, a hole can be made with a cork borer; wet the glass with water or glycerine and protect your hand with a cloth when inserting it.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana, India, supplies this rubber stopper as part of its range of laboratory accessories for schools, colleges and institutions. Buyers can combine stoppers with the tubes, flasks and other items they need on one quotation, which keeps purchasing for a whole lab simple. Our company profile has more information.
