Description :

Petri Dish (Product Code: SCL315/057) is a 3 inch diameter borosilicate glass culture dish used to grow, hold and observe cultures, seedlings and small specimens in biology and microbiology labs. Its crystal clear glass is heat and chemical resistant, so the dish can be sterilised, used with media and stains, washed and brought back into service many times. This reusable glass petri dish for labs in India and abroad is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and petri dish supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Diameter	3 inches
Material	Borosilicate glass
Glass type	Crystal clear glass
Colour	Clear
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Product code	SCL315/057
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Glass Petri Dish Used For?

Petri dishes are the standard vessel for bacteria culture experiments: sterile agar is poured in, allowed to set, then inoculated with swabs from hands, surfaces or air exposure to show where microbes grow. Botany classes line a dish with moist filter paper to germinate seeds and follow root and shoot growth day by day, while other groups use dishes to grow bread mould, observe small aquatic organisms under a hand lens, or hold specimens during dissection. Few items of microbiology lab equipment are used as often in a school or college.

Sterilise glass dishes before culture work by the method your lab follows, and allow them to cool gradually. Label the base rather than the lid, since lids can be swapped. After microbial work, sterilise the used dishes and their contents before washing, then clean with detergent and rinse well so no residue affects the next culture.

OEM Manufacturer

Jain Scientific Equipments Private Limited trades as ScienceLab and is the OEM (original equipment manufacturer) of this petri dish, which it makes at its own licensed factory at Saha, Ambala, Haryana, India. Schools, colleges, hospital laboratories, dealers and importers are supplied factory-direct, so the glassware does not pass through a trader before it reaches the bench
