Description :

Reagent Stand (Product Code: SCL323/060) is a brown wooden rack with 12 places used tohold reagent bottles upright and in order on biology and chemistry practical benches. Studentgroups sharing a common set of test solutions for food tests, staining or qualitative analysis canfind each bottle in the same spot every lesson. This piece of school biology lab equipment ismade by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and biologylab equipment supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Material	Wooden
Colour	Brown
Number of places	12
Purpose	Holds reagent bottles
Product code	SCL323/060
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Reagent Stand Used For?

Placing one stand on each bench, or one per student group, gives every team the same twelve reagents in a fixed order, so iodine solution, Benedict's reagent, dilute acids and indicators are always found in the same spot. That arrangement shortens setup time in a practical period and lowers the chance of a bottle being knocked over or picked up by mistake. Many teachers label each place to match the bottle label, which makes it quick to check at the end of class that every bottle has been returned.

A wooden stand is light to move between benches and gentle on glass bottles, but its surface can absorb spills. Wipe drips promptly with a damp cloth, keep strong acids and alkalis on a separate tray, and keep the stand away from open flames. When planning a school laboratory setup in India, reagent stands are usually ordered together with matching sets of reagent and dropping bottles.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, is the OEM (original equipment manufacturer) of this reagent stand and builds it at its own licensed factory at Saha, Ambala, Haryana, India. Institutions, dealers and importers buy it factory-direct, which means one quotation from the maker for enough stands to equip every bench. When you want matching stands for a new lab later, ask us and the manufacturer itself will handle the repeat order. More about the business is on our company profile.
