Description :

Dissection Set (Product Code: SCL325/61) is a student kit of 17 basic surgical instruments used to open, separate and examine plant and animal specimens in biology lab experiments. The stainless steel instruments have a mirror finish and come packed in a leather kit, so each zoology or botany student keeps a complete personal set between practicals. This dissection set for biology classes in India and abroad is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Number of instruments	17
Instrument type	Basic surgical instruments for lab experiments
Intended users	Students
Material	Stainless steel
Finish	Mirror
Packing	Leather kit
Single-use option	Single-use instruments may also be available; ask us
Product code	SCL325/61
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Dissection Set Used For?

In a typical zoology practical the specimen is pinned out in a wax tray, the outer tissue is lifted and opened with fine cutting instruments, and blunt probes are used to tease structures apart without damaging them so organs can be identified and drawn. Botany students use the same kind of instruments to split flowers into their whorls, remove anthers and ovaries, and cut thin hand sections of stems and roots for staining and mounting. With a personal kit of 17 pieces, each student can follow the procedure step by step instead of waiting to share tools.

Stainless steel with a mirror finish is easy to wipe down and shows any residue clearly. Rinse the instruments in water straight after the practical, dry them thoroughly and only then return them to the leather kit, because moisture trapped inside a closed case is what usually dulls and stains blades. Keep cutting edges from knocking against each other, and supervise younger students closely when sharp instruments are in use. Schools buying a dissection kit for school labs in India often order one kit per student plus a few spares for the teacher's bench.

What to Specify When Ordering

- The number of kits you need, for example one dissection set per student plus spares for the teacher.
- Whether you want the standard stainless steel set or single-use instruments, which the
