Description :

Universal Bottle PP Cap (Product Code: SLE/P/30) is a 30 ml universal bottle closed with a polypropylene (PP) cap, used to collect, hold and label small samples in biology, chemistry and microbiology teaching laboratories. Its compact 30 ml volume suits individual student samples, reagent portions and specimens that need a screw closure. The bottle is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Universal bottle
Volume	30 ml
Cap	PP (polypropylene) cap
Product code	SLE/P/30
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Universal Bottle Used For?

“Universal” bottles earn their name because one small screw-capped bottle can do many jobs: holding a water sample from a pond survey, a portion of a stock solution for one practical group, a soil extract, or a specimen being passed from one bench to another. At 30 ml, it is large enough to label clearly yet small enough that a whole class set fits in one tray.

Write the contents, date and group name on each bottle before filling, leave a little headspace, and screw the PP cap down firmly before carrying it. Microbiology lab equipment in India often includes universal bottles for culture media and water testing practicals; ask us if you need to confirm the bottle body material for your procedure.

OEM Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, is the OEM behind the Universal Bottle PP Cap. The bottles are produced at the company’s own licensed factory at Saha, Ambala, Haryana, and supplied factory-direct to schools, colleges, dealers and importers. Dealers restocking bottles for their own customers can place repeat orders straight with the manufacturer. For more about the company, see the ScienceLab company profile.
