Storage	Sturdy plastic bucket
Main use	Whole-class problem-solving with tangram puzzles
Product code	SLE/MAT/37
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are 6-Color Tangrams Used For?

A tangram is a square cut into seven pieces that can be rearranged into many outlines, from simple shapes to animals and people. With 30 tangrams in one bucket, each student in a class of up to 30 can solve the same challenge at once, compare strategies and explain how they matched the outline. The puzzles build problem-solving, spatial visualisation and the vocabulary of triangles, squares and parallelograms.

The six colours make classroom management easier: pieces can be sorted back into sets quickly, and pupils can record a finished design by colour on paper. Returning every tangram to the plastic bucket after the lesson keeps the class set complete for the next group.

OEM Manufacturer

This set of 6-Color Tangrams is manufactured by Jain Scientific Equipments Private Limited, the company behind the ScienceLab name, acting as the OEM (original equipment manufacturer). Production takes place at its own licensed factory at Saha, Ambala, Haryana, India, and sets go factory-direct to schools, colleges, dealers and importers. Buying from the manufacturer means your quotation, any repeat order and questions about replacement pieces are handled in one place, so ask us whenever you need them. The ScienceLab profile has more about the company.
