Product Name :

Circle Kit

Product Code :

SLE/MAT/43

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Circle Kit (Product Code: SLE/MAT/43) is a set of three foam circular discs used to teach radius, diameter and circumference in school maths classrooms. The discs have diameters of 15 cm, 10 cm and 5 cm, so pupils can stack them as concentric circles and compare how the circumference grows with the diameter. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM school lab equipment manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Contents	Set of three circular discs of different radius
Disc diameters	15 cm, 10 cm and 5 cm
Material	Foam
Concepts covered	Circles, concentric circles, radius, diameter, circumference and derivation of Pi
Product code	SLE/MAT/43
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Circle Kit Used For?

The Circle Kit gives pupils real circles to handle instead of drawings. Stacking the three discs, largest at the bottom and centres lined up, shows concentric circles. Measuring straight across each disc through its centre gives the diameter, and halving it gives the radius, which clears up the common mix-up between the two terms.

For circumference, pupils wrap a string or paper strip once around the edge of each disc, straighten it and measure it. Dividing each circumference by its diameter gives nearly the same value for all three discs, and that constant is Pi. Because the discs are foam, they are light and durable enough for repeated group work, and easy for teachers to pass around the class.

OEM Manufacturer

The Circle Kit is an original ScienceLab product. Jain Scientific Equipments Private Limited, which trades as ScienceLab, is its OEM and makes the kit at its own licensed factory in Saha, Ambala, Haryana. Because the manufacturer deals with buyers directly, schools and distributors can ask the factory itself about repeat orders or replacement discs. Learn more on the ScienceLab company profile.
