Product Name :

Ls Of Mammalian Ovary

Product Code :

SCL450/0173

Image not found or type unknown

Description :

Ls Of Mammalian Ovary (Product Code: SCL450/0173) is a prepared longitudinal section of a mammalian ovary used to show the organ cut along its long axis in reproductive biology practicals at school, college and university level. Seeing the full length in one view helps students understand how follicles spread through the cortex and how the central medulla links to the blood supply. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, in a white rectangular plastic box.

Key Details

Parameter	Detail
Product type	Prepared microscope slide
Specimen	Mammalian ovary
Orientation	Longitudinal section (L.S.)
Slide material	Borosilicate glass, clear
Container	Rectangular plastic box, white
Purpose	Laboratory study of ovarian structure along the long axis
Product code	SCL450/0173
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Mammalian Ovary L.S. Slide Used For?

Because the cut runs from one end of the ovary towards the other, the section generally looks elongated, with a band of cortex following the outer margin and the medulla running through the middle. Students can map where follicles cluster, note that the smallest ones sit just beneath the surface layer, and look for larger developing follicles bulging towards the edge. Where the section happens to include the hilum, the vessels entering the medulla can be traced as well.

The slide is most valuable when taught next to a transverse section. Ask students to predict what each orientation will show before they look, then combine the two views into one mental model of the organ — a plane-of-section skill that examiners reward. This is why many departments keep both orientations among their prepared microscope slides for reproduction practicals. Between sessions, keep the slide in its box and clean the glass only with soft lens tissue.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the Ls Of Mammalian Ovary slide from Ambala, Haryana, India, to schools, colleges and universities in India and international markets. Our company profile describes the company and the laboratory range it supplies.
