Description :

Half Meter Scale (Product Code: SLE/MAT/45) is a wooden ruler used to measure any length up to half a metre in school maths and science classrooms. Its markings run up to 50 cm, a handy length between a short desk ruler and a full metre stick. The scale is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM and scientific lab equipment manufacturer in Ambala, India, at its own factory there.

Specifications

Parameter	Detail
Material	Wood
Marked length	Up to 50 cm
Measuring range	Any length up to half a metre
Product code	SLE/MAT/45
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Half Meter Scale Used For?

The Half Meter Scale is used for everyday length measurement in the maths lab: measuring books, desks and cut-out shapes, drawing long straight lines on charts, and checking edges that are too long for a short desk ruler. In mensuration lessons pupils record the measured sides and use them to work out perimeter and area.

For accurate readings, lay the scale flat against the object, line up the zero mark with one end, and read the marking with your eye directly above it to avoid parallax error. Lengths longer than half a metre can be measured by marking the end point and moving the scale along, which is itself a useful lesson on how measurement errors add up.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, the original equipment manufacturer of this Half Meter Scale. The company makes it at its own licensed factory in Saha, Ambala, Haryana, and sells factory-direct to schools, colleges, dealers and importers. Visit the ScienceLab company profile to learn more about the company.

Related Maths Lab Equipment

For measuring tasks shorter or longer than half a metre, these items complete the set:

- Folding Meter Stick — for lengths up to a full metre that still fold away for storage.
- Meter Stick, White — a full-length metre stick for longer measurements.
- Windup Meter Tapes — for measuring room, corridor and field distances.
- T-Square — for drawing straight and perpendicular lines on charts.
