Description :

Marchantia (Product Code: SCL463/0185) is a botanical specimen of the liverwort *Marchantia* in a glass specimen jar, used to show a thalloid bryophyte in school and college botany practicals. Teachers use it to give students a real example of a small, flat, ribbon-like plant body with no true roots, stems or leaves, instead of relying only on textbook drawings. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of the plant biologylab equipment it offers institutions.

Key Details

Parameter	Detail
Type	Biological specimen (plant)
Specimen	Marchantia, a thalloid liverwort (bryophyte)
Supplied in	Glass specimen jar
Purpose	Laboratory observation of the liverwort plant body
Suitable for	Botany practicals, plant-kingdom lessons and specimen display shelves
Product code	SCL463/0185
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Marchantia Specimen Used For?

Marchantia is one of the standard examples used to introduce bryophytes. Looking through the jar wall, students study the flattened, forked (dichotomously branched) thallus and discuss how such plants take in water over their whole surface and anchor themselves with fine rhizoids rather than roots. Depending on the material in an individual jar, a teacher may also be able to point out gemma cups or the stalked, umbrella-like structures that carry the sex organs; our product details do not specify which of these are present.

In a practical session the jar works well at a specimen station where groups rotate, note what they see and draw a labelled sketch of the thallus. Pairing it with a moss chart lets the class compare liverworts and mosses, the two bryophyte groups most syllabi cover. To keep the specimen in good condition, keep the lid closed, store the jar upright away from direct sunlight and carry it with both hands.

Supplier

The Marchantia specimen is supplied by **Jain Scientific Equipments Private Limited**, which trades under the **ScienceLab** name from Ambala, Haryana, India, and provides laboratory equipment and teaching material to educational institutions and dealers. Specimens like this one are sourced by the company and quoted alongside its charts and slides. Our company profile gives more background on the company.
