Description :

Earthworm (Product Code: SCL480/0205) is a laminated wall chart used to teach the earthworm, the annelid most zoology syllabuses use to introduce segmented animals, in school and college biology classes. Students know earthworms from gardens and compost heaps, so the 75 x 100 cm polyart chart lets a teacher start from familiar ground and move on to segmentation, locomotion and soil health. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and biology lab equipment supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Type	Chart
Subject	Earthworm (Annelida)
Material	Polyart
Size	75 x 100 cm
Finish	Laminated
Suitable for	Schools and laboratories
Product code	SCL480/0205
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Earthworm Chart Used For?

The earthworm is the classic example of metameric segmentation: the body is divided into a series of similar ring-like segments, and many organs repeat from one segment to the next. Lessons normally cover the thickened band called the clitellum, the tiny bristles or setae that grip the soil while circular and longitudinal muscles alternately contract, and the closed circulatory system. Earthworms are hermaphrodites, yet two worms still exchange sperm, and the clitellum later secretes the cocoon in which the eggs develop — a point that surprises most students.

A good practical is to let students watch a live worm crawl across damp paper and listen for the setae scratching, then compare what they saw with the chart. Many schools now pair charts with prepared slides of earthworm sections instead of dissecting animals, which keeps the anatomy lesson while reducing animal use; the chart is equally at home as school biology lab equipment for a guided dissection. It also supports environmental lessons on how burrowing aerates soil and how earthworms turn plant waste into vermicompost.

OEM Manufacturer

The Earthworm chart is manufactured by **Jain Scientific Equipments Private Limited** — **ScienceLab** — as the OEM (original equipment manufacturer), at the company's own licensed factor ns, deale eal with a of the b
