Description :

Types Of Joints (Product Code: SCL496/0220) is a laminated wall chart used to teach the different kinds of joints in the human body and the movement each one allows, in school biology, physical education and sports science classes. On 75 x 100 cm polyart, it bridges the step from naming bones to understanding how the skeleton bends, twists and rotates. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Type	Chart
Topic	Types of joints in the human body
Material	Polyart
Size	75 x 100 cm
Finish	Laminated
Used in	Schools and laboratories
Product code	SCL496/0220
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Types of Joints Chart Used For?

Joints are usually taught in two ways at once: by how much movement they permit (immovable, slightly movable and freely movable) and, for the freely movable synovial joints, by shape, such as ball and socket, hinge, pivot and gliding. A single chart on the wall keeps both classifications in view, so students can match an example such as the shoulder, elbow or neck with its joint type and then try the movement on their own bodies. This active approach works well in biology, physical education and sports science classes.

For a practical lesson, place the chart next to a set of joint models or a human body model kit so learners can compare the flat outline with a three-dimensional joint and see how ligaments and cartilage hold the bones together. A short worksheet that asks students to predict the movement range of each joint, and then test it against the chart, gives the lesson a clear structure.

OEM Manufacturer

Jain Scientific Equipments Private Limited, the company behind the **ScienceLab** name, is the OEM manufacturer of the Types Of Joints chart. It is made at the company's own licensed factory at Saha, Ambala, Haryana, India, and sold factory-direct to schools, colleges, sports science departments, dealers and importers, who can return to the maker for repeat orders.
