Description :

Human Brain (Product Code: SCL517/0233) is a dissectible anatomical model used to teach the regions of the human brain in secondary school biology, college physiology and nursing classes.It separates into 8 parts covering the frontal and parietal lobe, the temporal and occipital lobe, the encephalic trunk and the cerebellum, so students can lift regions away and see how they fit together. The model is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Human brain model with dissectible parts
Number of parts	8
Regions included	Frontal and parietal lobe; temporal and occipital lobe; encephalic trunk; cerebellum
Product code	SCL517/0233
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Human Brain Model Used For?

Most lessons start with the assembled brain on the teacher's desk. Removing the pieces one at a time lets the class name each region and link it to its main role: the frontal lobe with planning, decisions and voluntary movement; the parietal lobe with touch and body position; the temporal lobe with hearing and memory; and the occipital lobe with vision. The cerebellum, tucked beneath the back of the cerebrum, coordinates balance and fine movement, while the encephalic trunk (brainstem) joins the brain to the spinal cord and controls automatic functions such as breathing and heart rate.

Because the regions come apart, the model also makes a good revision exercise, with students taking turns to rebuild it and explain what each part does. It fits naturally beside eye and ear models in a unit on the sense organs and their brain centres. After each class, count the parts before storing the model, wipe it with a soft, slightly damp cloth and keep it away from direct heat and strong sunlight.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known to customers as ScienceLab, is the OEM (original equipment manufacturer) of the Human Brain model and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Purchase departments that need vendor details can register the company under GSTIN 06AAECJ8618A1ZT and Legal Entity Identifier (LEI) 3358004HRD1JIVXKYX49. As the model is supplied factory-direct, colleges and dealers get quotations, repeat orders and answers on spare parts from the maker itself. Read more in our comp
