Description :

Vertical Stand With 3 Clamps (Product Code: SCL230/015) is an iron retort stand with a vertical rod, three clamps and boss heads, used to hold glassware and apparatus at fixed heights during experiments. Its 7 x 5 inch base is powder coated and the mild steel rod is chrome plated, so a burette, test tube, flask, thermometer or pendulum can be clamped at the same time. It is madeby **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factoryin Ambala, India.

Specifications

Parameter	Detail
Type	Iron retort stand
Size	7 x 5 in base
Base material	Iron, powder coated (listed as cast iron and as sheet metal —confirm the base type when ordering)
Rod	Mild steel, chrome plated
Clamps	3 clamps, each with a boss head
Holds	Burettes, test tubes, flasks and similar apparatus
Product code	SCL230/015
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Vertical Stand Used For?

With three clamps on one rod, a single stand can hold several parts of a set-up at once — for example a thermometer above a boiling tube, a burette over a flask, or a split cork gripping a pendulum thread with a second clamp steadying a scale. In physics it also supports springs for Hooke's law and spring balances for weighing.

Keep the heaviest load over the base, tighten each boss head firmly on the rod, and close clamps on glassware only enough to hold it without strain. Wipe the rod after spills so the chrome plating stays clean. A stand like this is standard lab stand, clamp and boss head equipment for school physics and chemistry benches alike.

What to Specify When Ordering

- Base type — confirm cast iron or sheet metal, both powder coated, as described in the listing.
- Number of stands per bench or lab.
- Whether extra clamps or boss heads should be quoted for more complex set-ups.
