Description :

Asbestos Sheet Plain (Product Code: SCL-519/09) is a flat, square bench sheet used as a base under burners, tripods and hot apparatus during heating work in school and college laboratories. Chemistry teachers and lab technicians lay the 2 ft x 2 ft, 6 mm thick sheet on ordinary benches to keep flame, hot metal and spills off the bench top. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Size	2 ft x 2 ft
Thickness	6 mm
Pattern	Plain
Shape	Square
Product code	SCL-519/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Asbestos Sheet Used For?

In a heating practical the sheet goes down first, and the tripod stand, wire gauze and burner are arranged on top of it so the whole set-up stands on one flat, level surface. Its plain face is also a resting place for a hot crucible or beaker lifted off the tripod with crucible tongs, keeping hot glassware off wooden or laminated benches. Giving every workstation the same square base lets a teacher see at a glance whether each group has kept its flame and hot apparatus inside its own area.

Keep the sheet flat and supported over its full area, and do not cut, drill, sand or break it, because damaging the surface can release dust. Clean it with a lightly damp cloth rather than brushing it dry, let it dry before the next session, and withdraw any sheet that is cracked, chipped or crumbling at the edges, disposing of it according to your local rules.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, sources and supplies the Asbestos Sheet Plain alongside the burners, tripods and other heating apparatus in its Chemistry Lab range. Because rules on this type of material vary, ask us to confirm its exact composition before you order.

Institutions and dealers in India and international markets can buy it together with the rest of their lab list on one quotation. More about the company is on our [company profile](#).

Related Chemistry Lab Equipment

A bench sheet is used as a base under burners, tripods and hot apparatus during heating work in school and college laboratories. It is used to keep flame, hot metal and spills off the bench top. It is supplied by Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India.
