Product Name :

Metric Attachment Weight Set

Product Code :

SLE/ME/08

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Metric Attachment Weight Set (Product Code: SLE/ME/08) is a set of metric attachmentweights used to extend the weighing capacity of a mechanical beam balance in school andcollege laboratories. According to the product listing, the set takes a balance with a 610 gcapacity up to 2,610 g, so heavier objects can be weighed without buying a second, largerbalance. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Product type	Metric attachment weights for a beam balance
Capacity extension	From 610 g up to 2,610 g on a compatible balance (as listed)
Units	Metric (grams)
Product code	SLE/ME/08
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Metric Attachment Weight Set Used For?

Attachment weights let a beam balance weigh objects heavier than its sliding riders can reach. Each weight is attached at the end of the beam and adds a fixed amount to the reading; theriders then measure the remainder, and the object's mass is the sum of the attached weights and the rider readings. Students can weigh rocks, filled containers, soil samples or bulky apparatus that would otherwise overload the balance.

Used this way, a single balance covers both light and heavy work in mechanics lab equipment sets and general science practicals. Zero the balance with nothing on the pan before attaching any weight, handle the weights with clean, dry hands, and keep the set together so no piece goes missing. A dirty or damaged weight changes every reading made with it, so inspect the set at the start of each term.

What to Specify When Ordering

- The make, model and capacity of the beam balance you will use it with (the listing describes use with a 610 g balance).
- How many sets you need, usually one per balance.
- Whether you also need a beam balance quoted with the set.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, which supplies the Metric Attachment Weight Set from Ambala, Haryana, to schools, colleges, science centres and dealers in India and international markets. Because attachment weights have to suit the beam they hang on, buyers are asked to share their balance details in the enquiry so the right set is quoted. Company background is on the ScienceLab profile.
