Description :

Chemical Splash Protection Goggle (Product Code: SCL-533/016) is a compact, lightweight safety goggle used to protect the eyes from liquids, dust and large flying particles in chemistry laboratories, workshops and training rooms. It pairs a clear polycarbonate lens with a flexible transparent plastic frame and is impact, scratch, liquid and dust resistant, answering the everyday need for safety goggles in school labs across India. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Frame material	Flexible transparent plastic
Lens	Clear polycarbonate, high resistance to flying particles
Resistance	Impact, scratch, liquid and dust resistant
Protection	Against large flying particles
Build	Compact and lightweight
Applications	Use with chemicals; construction and mechanical applications
Product code (Model No.)	SCL-533/016
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Chemical Splash Goggle Used For?

In the chemistry lab the goggle goes on before any reagent bottle is opened and stays on until the bench has been cleared: diluting acids, carrying out titrations, heating liquids in test tubes and washing glassware all carry a risk of splashes. The flexible frame follows the face more closely than rigid spectacles, and the clear lens keeps burette readings and colour changes easy to see. Because it also stands up to flying particles and dust, the same goggle serves in workshops, construction training and mechanical practicals, so one stock item covers several departments.

Wear it with a lab coat and gloves for complete personal protection. After use, rinse the goggle under running water, wash with a mild soap and dry it with a soft, lint-free cloth; avoid solvents and rough tissues that could cloud the lens. Where goggles are shared between classes, wipe them with a suitable disinfectant between users and store them in a clean, closed box away from direct sunlight.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, India, supplies this goggle as part of the laboratory safety range it sources for schools, colleges, workshops and training centres. Class sets can be quoted together with gloves, lab coats and eye-wash equipment, so a department's personal protection arrives in one consignment, for delivery across India and to international markets. The ScienceLab company profile has more about
