Description :

pH Chart Laminated (Product Code: SCL-539/019) is a laminated wall chart on pH, used to help students place acidic, neutral and alkaline results while testing solutions in school classroomsand laboratories. It is printed on good-quality Polyart and fitted with plastic rollers for hangingbeside the bench where indicator tests are done. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Type	Laminated wall chart
Subject	pH
Material	Good-quality Polyart
Mounting	Plastic rollers
Suitable for	Schools and laboratories
Size and artwork	Please ask us for current details before ordering
Product code	SCL-539/019
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the pH Chart Used For?

Hang the chart beside the bench where indicator tests are done. When students dip pH indicator paper into a solution or add a few drops of universal indicator, they can turn straight to the chart to decide whether the sample is acidic, neutral or alkaline. In theory lessons, teachers point to it while discussing everyday acids and bases, the effect of dilution and what happens during neutralisation, so the same visual anchor is used in the classroom and the practical.

Lamination lets the Polyart surface be wiped clean with a slightly damp cloth if it is splashed, which matters in a working lab. Hang it by the plastic rollers on a dry wall away from sinks and direct sunlight, and roll it up loosely, printed side out, if it has to be stored or moved between rooms.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, supplies the pH Chart Laminated together with indicator papers, solutions and other chemistry teaching aids. Schools, education departments and distributors in India and international markets can combine charts and consumables on one quotation. Visit our company profile to learn more about the company.
