Description :

Chemical Bonding Chart (Product Code: SCL-547/023) is a classroom-sized 75 x 100 cm wall chart used to teach how atoms join to form compounds in school and college chemistry. It hangs from a plastic roller, and its colour print on poly art plastic sheet has a weather-proof surface that can be washed and marked with notes. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Subject	Chemical bonding
Size	Classroom sized, 75 x 100 cm
Print	Coloured, on poly art plastic sheet
Mounting	Fitted with plastic roller
Surface	Weather proof, washable and markable
Product code	SCL-547/023
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Chemical Bonding Chart Used For?

Bonding is one of the more abstract ideas in school chemistry: students have to picture electrons being transferred or shared and then connect that to the properties of salts, molecular substances and metals. A large wall chart gives the class a common visual while the teacher explains, and it stays up for revision long after the first lesson. Students can then build the same substances with molecular model sets to see how bonding decides shape, so the chart is a natural partner for a chemistry teaching kit in Indian classrooms.

The markable surface lets a teacher sketch dot-and-cross diagrams or arrows beside the printed artwork during the lesson and wipe them away before the next group arrives. Clean the chart with a soft, damp cloth, hang it flat by its plastic roller, and roll it loosely if it has to move between classrooms.

Supplier

ScienceLab is the trading name of **Jain Scientific Equipments Private Limited** in Ambala, Haryana, which supplies the Chemical Bonding Chart with molecular model kits and other chemistry charts for classroom teaching. Schools, colleges and distributors in India and international markets can quote charts and models together. See the ScienceLab company profile for details.
