# Description :

**Elements with Name, Atomic Number, Atomic Mass And Symbol** (Product Code: SCL-551/025) is a chemistry wall chart depicting important elements together with their names, symbols and atomic masses, along with the atomic numbers given in its title. It serves as a quick-reference display for students learning to write chemical symbols and formulae and to calculate molecular masses, and it complements a full periodic table chart in Indian school classrooms by keeping the most frequently used data in one easy-to-scan place. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

## Key Details

| Parameter | Detail |
|---|---|
| Model No. | SCL-551/025 |
| Type | Teaching wall chart |
| Content | Important elements with their names, symbols and atomic mass; atomic number as per the chart title |
| Purpose | Quick reference for symbols, formula writing and molecular mass calculations |
| Suitable for | School chemistry classrooms and laboratories |
| Size and material | Please confirm with us before ordering |

## Typical Use

When students first meet chemical symbols, they need to learn which letters stand for which element and how much each atom weighs relative to others. A chart listing the important elements with their name, symbol, atomic number and atomic mass lets them look up values while writing formulae or working out the molecular mass of a compound, instead of flipping through a textbook. Teachers often turn it into a quick-fire quiz: name an element, and the class calls out its symbol or atomic mass from the wall.

In the laboratory the same chart helps with mole and mass calculations before a practical, as part of the school chemistry lab equipment in India that supports both theory and practical sessions. Hang it where students can read it from their seats or benches, and store it rolled, in a dry place away from direct sunlight, when it is not on display.

## Manufacturer

Jain Scientific Equipments Private Limited trades as ScienceLab and is based in Ambala, Haryana, where it makes charts, models and laboratory apparatus for schools and colleges in India and international markets. The ScienceLab company profile has more about the company.
