Product Name :

Hand Gloves

Product Code :

SCL-571/035

Image not found or type unknown

Description :

Hand Gloves (Product Code: SCL-571/035) are thick rubber gloves with a plain pattern and chemical resistance, worn to protect the hands while preparing solutions, carrying reagent bottles, handling waste containers and washing glassware in the chemistry laboratory. Thick rubber stands up to longer, heavier jobs at the sink or preparation bench where thin examination gloves tend to tear. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a school laboratory equipment supplier in India that also stocks personal protective itemsfor practical rooms.

Specifications

Parameter	Detail
Model No.	SCL-571/035
Material	Thick rubber
Chemical resistance	Chemical resistant
Pattern	Plain
Sizes available	Not stated; please check with us

Typical Use

Lab assistants wear these gloves when diluting stock reagents, filling bench bottles before a practical, cleaning glassware with detergent or cleaning solutions, and emptying waste containers afterwards. Teachers preparing solutions for a whole class also benefit from a pair that covers the hands fully and does not split during a long session. Pull the gloves on over dry hands and make sure the cuffs overlap the sleeves of the lab coat so that splashes cannot run inside.

Before each use, check for holes by trapping air in the glove and squeezing it gently. Wear the gloves together with safety goggles and a lab coat, because hands are only one of the areas a splash can reach. Remove them by peeling them off inside out, wash your hands afterwards, rinse the outside of the gloves and let them dry away from sunlight. Rubber gloves do not protect against heat, so use tongs or a holder for hot apparatus.

Supplier

Jain Scientific Equipments Private Limited is the company behind the ScienceLab name, with its base in Ambala, Haryana. It supplies protective items such as these gloves, so that schools and colleges in India and international markets can equip a lab through one supplier. See the company profile for details.

Related Laboratory Equipment

Gloves are one part of the protection a chemistry lab needs. These items complete it:

- Chemical Splash Protection Google — eye protection worn with the gloves.
