Description :

Wall Mounting First Aid Kit (Product Code: SCL-579/039) is a wall-mounted, multi-compartment first aid cabinet used to keep first aid supplies in one fixed, visible place in chemistry labs, workshops and classrooms. Made of galvanized metal with a 7-way processed powder coating and a heavy clear acrylic front, the white rectangular cabinet lets staff check what is inside at a glance, making it a practical first aid box for a school lab. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Colour	White
Shape	Rectangular
Thickness	10–30 mm
Handle	Handle on the top
First aid contents	Not listed; please confirm with us
Product code (Model No.)	SCL-579/039
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Wall Mounting First Aid Kit Used For?

Mount the cabinet at a height adults can reach easily, close to the lab exit or sink and in clear view from the benches. The compartments let you separate items when stocking it – dressings in one section, bandages and tape in another, scissors and disposable gloves in a third – so nothing has to be searched for during an incident. Through the clear acrylic front, the person responsible for safety can see at a glance whether anything is missing during routine checks.

Make the cabinet part of a safety corner that also includes an eyewash station, the fire extinguisher and a displayed list of emergency contacts. Appoint one staff member to restock it after every use and to check the dates printed on stocked items each term. Wipe the powder-coated body and the acrylic front with a soft damp cloth and mild soap; avoid solvent cleaners, which can cloud acrylic.
