Description :

Weighing Paper (Product Code: SLE/ME/12) is a glazed paper sheet used to hold powders and small solids on a balance pan so they can be weighed cleanly in school, college and testing laboratories. Each sheet measures 3 × 3 in, and its smooth glazed surface protects the scale and helps prevent contamination from one sample to the next. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India, among its chemistry consumables.

Specifications

Parameter	Detail
Material	Glazed paper
Sheet size	3 × 3 in
Purpose	Protects balance pans and helps prevent sample contamination
Product code	SLE/ME/12
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is Weighing Paper Used For?

Whenever a practical calls for a measured amount of a solid, such as copper sulphate for acrystal-growing lesson or sodium chloride for a standard solution, a sheet of weighing paper sits between the chemical and the pan. The glazed finish means powder does not soak in or cling, so almost all of it slides off into the flask, and the pan stays free of corrosive residues.

Fold the sheet once from corner to corner and open it slightly to make a shallow channel. Set it on the pan, tare the balance, add the solid with a clean spatula, then tip it along the crease into the receiving vessel. Use a fresh sheet for each chemical; for liquids, damp materials or larger quantities, a plastic weighing boat is the sturdier choice.

Supplier

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, supplies Weighing Paper from Ambala, Haryana, to schools, colleges, testing laboratories and dealers in India and international markets. Labs usually add it to orders for balances, spatulas and other consumables so that everything for weighing practicals arrives together. Find out more on the ScienceLab profile page.

Related Measuring Equipment

Weighing paper is used with these balances and tools:

- Plastic Weighing Boats — rigid containers for liquids, damp solids or larger amounts.
- Compact Balance — a portable balance for student weighing.
- Electronic Balances — digital balances for routine laboratory weighing.
