Description :

Roman Numbers Kit (Product Code: SLE/MAT/49) is a set of printed square tiles used to build and read Roman numerals in primary maths classrooms. It pairs 14 large magneticdemonstration tiles for the teacher with 270 small activity tiles for pupils, so the whole class canfollow one example and then practise on their own. The kit is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Tiles	Square tiles printed with Roman numerals
Teacher demonstration tiles	14 pcs, big, magnetic
Student activity tiles	270 pcs, small
Purpose	Representing any number in Roman numerals; number recognition and number names
Product code	SLE/MAT/49
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Roman Numbers Kit Used For?

The Roman Numbers Kit teaches pupils to build numbers from Roman symbols rather than memorise a chart. The teacher places the big magnetic tiles on a magnetic surface, such as a steel whiteboard, to show how symbols combine, and pupils copy and extend the example with their own small tiles.

Typical activities include converting a given number to Roman form and back, spotting the subtraction rule when a smaller symbol comes before a larger one, and reading Roman numerals on clock faces, book chapters and building dates. Saying each number aloud as it is built also reinforces number recognition and the words for different numbers.

OEM Manufacturer

Jain Scientific Equipments Private Limited, which trades as ScienceLab, is the original equipment manufacturer of the Roman Numbers Kit and produces it at its own licensed factory in Saha, Ambala, Haryana. As one of the school lab equipment manufacturers in India that sells factory-direct, it quotes schools, education departments, dealers and importers without a trading layer in between. Company details are on the ScienceLab company profile.
