Description :

Winchester Bottle with Lid (Product Code: SCL-733/112) is a 1000 ml clear borosilicate glass storage bottle with a lid, used for holding the bulk stock of a solution or liquid from which smaller bench bottles are refilled. Lab assistants use it to keep a prepared litre of dilute acid, a salt solution or distilled water in one place, so the whole class works from the same batch. The clear glass shows the level and condition of the contents at a glance, and it is heat resistant and chemical resistant like other borosilicate laboratory glassware. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Product Code	SCL-733/112
Capacity	1000 ml
Material	Borosilicate glass
Colour	Clear
Closure	Lid
Resistance	Heat resistant, chemical resistant
Purpose	Bulk storage of laboratory liquids and stock solutions

Typical Use

Before a practical, a lab assistant prepares a litre of the required stock, stores it in the Winchester bottle and then fills each bench bottle through a funnel. Keeping one stock bottle per solution makes it easy to record when a batch was made, to check that every bench is working with the same concentration, and to top up bench bottles between classes without preparing fresh solution each time. Because the glass is clear, it is best used for liquids that are not affected by light; light-sensitive reagents belong in amber bottles.

Always carry a filled bottle with one hand under the base and never by the lid or neck alone. Keep it on a low shelf of a lab storage cabinet rather than on a high rack, separate acids from alkalis, and store any volatile liquids away from heat and direct sun. Label the bottle with the contents, concentration and preparation date, allow warm solutions to cool before closing the lid, and leave some air space below the neck.

Manufacturer

Jain Scientific Equipments Private Limited uses the trading name ScienceLab and is based in Ambala, Haryana, where it manufactures laboratory glassware and apparatus for institutions in India and international markets. Learn more on the ScienceLab profile.
