Product Name :

Upper Primary Maths Kit

Product Code :

SLE/MAT/52

Description :

Upper Primary Maths Kit (Product Code: SLE/MAT/52) is a maths teaching kit used to build elementary mathematics skills through simple learning methods and games in upper primary classrooms. Primary schools and institutions use it for hands-on activities, and the kit is offered in several specifications to suit their requirements. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM educational laboratory equipment manufacturer, at its own factory in Ambala, India.

Kit contents	Depend on the specification chosen; confirm with ScienceLab
Product code	SLE/MAT/52
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Upper Primary Maths Kit Used For?

The Upper Primary Maths Kit is intended for pupils who are building on early number skills. Its simple learning methods and games let teachers introduce an elementary mathematics idea through activity first, so children see why a method works before practising it on paper.

Because the kit is offered in several specifications, a school should decide which topics and how many pupils it must cover before ordering. Keeping the kit in a maths corner or lab, with a checklist of its parts, makes it easy to share across several classes as part of a school lab setup.

What to Specify When Ordering

- The specification or topic list your school needs
- Number of kits, per class or per group
- Class level and the number of pupils using each kit
- Delivery location, and whether the order is for a school, tender or resale

OEM Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, is the OEM of the Upper Primary Maths Kit and both manufactures and trades it. The kit is produced at the company's own licensed factory in Saha, Ambala, Haryana, so the specification you agree is quoted and made by the same company.
