Description :

Game of Place Value (Product Code: SLE/MAT/56) is a U-shaped wire abacus used to teach the place value of numbers up to lakh in primary maths classrooms. Its 6 wires each hold 9 beads, 54 beads in all, on a compact 20 cm × 7 cm unit, so pupils can build, read and compare six-digit numbers at their desks. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	U-shaped wire abacus
Wires	6
Beads	9 per wire, 54 in total
Size	20 cm × 7 cm
Place value range	Up to lakh
Product code	SLE/MAT/56
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Game of Place Value Used For?

Each wire of the Game of Place Value stands for one place: ones, tens, hundreds, thousands, ten thousands and lakhs in the Indian system. With at most nine beads on a wire, a place can never hold more than nine, which is exactly the rule pupils need to learn. Building a number bead by bead shows why the same digit is worth more on a wire further to the left.

The game comes from digit challenges: given a set of digits, pupils form the greatest and the smallest possible number, then compare answers with a partner. Teachers can also call out a number in words for pupils to build, or build a number and ask for its expanded form.

OEM Manufacturer

Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597) trades as ScienceLab and is the original equipment manufacturer of the Game of Place Value. The abacus is produced at the company's own premises at 449, HSIIDC Industrial Area, Saha, Ambala, which hold Haryana Factory Licence AMB-ONLINE-CHD-J-414. Schools, dealers and importers buy it factory-direct; for more about the company, see the ScienceLab company profile.
