**Product Name :**

PN Junction Diode

**Product Code :**

SCL-433/113

## Description :

### DESCRIPTION :-

- Pn Junction Diode Apparatus (Semiconductor diode experiment kit with two meters on board (superior))
- PN junction diode character instrument semiconductor diode kit used for studying semiconductor diode in forward and reverse condition
- Two round meter voltmeter and ammeter are used for current and voltage measurement, knobs are provided for adjustable
- The kit has inbuilt IC regular power supply for better performance in DC voltage.
- Portable and easy to use in physics, electronics lab related experiments in school or institute
