Description :

Dummy Clock (Product Code: SLE/MAT/60) is a lightweight model clock used to develop and reinforce time-telling skills in pre-primary and primary classrooms. Made of light fiber sheet with movable hour and minute hands, it is easy for young children to hold, set and read, making it a simple addition to any preschool kit in India. **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of educational laboratory equipment in India, makes it at its own factory in Ambala.

Key Details

Parameter	Detail
Material	Lightweight fiber sheet
Hands	Movable hour and minute hands
Handling	Light weight, easy to handle
Learning objective	Developing and reinforcing time-telling skill
Product code	SLE/MAT/60
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Dummy Clock Used For?

Children use the Dummy Clock to show the times that shape their day — assembly, lunch, games period, home time — and to copy times the teacher calls out or writes on the board. Working in pairs, one child sets a time and the other reads it aloud, which reinforces both setting and reading.

A useful tip: when pupils set half past or quarter past, ask them to move the hour hand slightly beyond the number, since this is where most early errors appear. When planning a complete maths lab setup for a school in India, teachers often keep a class set of these light clocks so every child can practise at the same time.

OEM Manufacturer

Jain Scientific Equipments Private Limited operates under the ScienceLab name and is the OEM (original equipment manufacturer) of the Dummy Clock. The clock is made at the company's own licensed factory at Saha, Ambala, Haryana, India, and dispatched factory-direct to schools, colleges, institutions and distributors in India and international markets. Quotations are issued by the manufacturer itself, with no trading middleman. Find out more on our company profile.
