Description :

Board Pin Packet (Product Code: SCL-470/130) is a pack of brass drawing pins used to fixpaper to drawing boards and pin-boards in physics practicals, classrooms and offices. In thephysics lab the pins hold a sheet of paper flat on a drawing board for ray-tracing experiments withmirrors, prisms and glass slabs. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a physics instruments supplier in India, for school, office and home use.

Key Details

Parameter	Detail
Item	Board pins (drawing pins), packet
Material	Brass
Use	Pin-boards; holding papers in place
Suitable for	School, office and home
Product code	SCL-470/130
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Board Pin Packet Used For?

Optics practicals such as refraction through a glass slab or prism and reflection from a plane mirror are drawn on paper fixed to a soft drawing board. Board pins at the corners stop the sheet shifting while students mark rays and object pins, which keeps angle measurements consistent. The same pins hold charts, timetables and notices on classroom pin-boards.

Press each pin in straight with the thumb, lift it out with a fingernail or pin lifter rather than prising with a scale, and keep the packet closed and away from young children. Brass pins are a simple stationery item that completes any school lab setup in India where optics experiments are drawn on paper.

Supplier

The Board Pin Packet is supplied by Jain Scientific Equipments Private Limited, which trades as ScienceLab, from Ambala, Haryana, to schools, colleges, offices and dealers in India and international markets. Schools often add stationery items like board pins to their optics orders so drawing boards are ready for use on arrival. Company information is on the ScienceLab company profile.

Related Physics Lab Equipment

Optics apparatus used with paper pinned to a drawing board:

- Drawing Board — the board the practical sheet is pinned to.
- Glass Slab — for the refraction experiment traced on pinned paper.
- Prism — for the angle of deviation experiment.
