Description :

Scale for Adults with Height Rod (Product Code: SCL241 /039) is a column-type weighingscale used to record adult body weight and calculate body mass index (BMI) in clinics, healthcentres, nutrition surveys and college medical rooms. It weighs up to 200 kg in 100 g graduationson a large, low, anti-slip platform that people can step onto easily. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Capacity	200 kg
Graduation	100 g
Precision	25 g (as listed)
BMI	Automatically calculates body mass index
Weight stabilisation	MotionLock Technology® helps eliminate unsteady weights
Calibration	Simple push-button calibration; calibrate with any sure (known) weight over 100 lb
Platform	One-piece powder-coated cast aluminium; large, anti-slip, positioned low for easy access
Column and console	Anodised aluminium
Construction	Durable, lightweight; quick and easy assembly
Surface	Washable
Height rod	Available with the scale — confirm when ordering
Product code	SCL241 /039
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Adult Scale with Height Rod Used For?

Nutrition programmes, general practice, antenatal and occupational-health checks all record weight and height together. With a height rod on the same scale, a single station can take both readings, and the console works out BMI automatically, so the health worker no longer has to calculate it by hand for every record.

Set the scale on a firm, level floor, run the push-button calibration with a known weight over 100 lb, then ask the person to stand still in the centre of the platform while the motion-lock feature steadies the reading. Because the platform is positioned low, access is easy, and the washable surface can be wiped clean between users.

What to Specify When Ordering
