Description :

Scale for Children with Height Rod (Product Code: SCL248 /040) is an electronic baby scale used to weigh infants and young children up to 20 kg in paediatric clinics, well-baby services and community nutrition programmes. It has 5 g sensitivity and a 60 x 40 mm LCD display, and it comes with a height tape meter and a washable sheet so length or height can be recorded at the same visit. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Electronic baby scale, handy design
Capacity	20 kg
Sensitivity	5 g
Display	LCD, 60 x 40 mm
Supplied with	Height tape meter and washable sheet
Power saving	Auto-off function to save battery
Product code	SCL248 /040
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Children’s Scale with Height Rod Used For?

Regular weighing is the backbone of child-growth monitoring: the change between one visit and the next shows whether a baby is gaining weight as expected. A 20 kg capacity covers infants and toddlers, and the listed 5 g sensitivity suits the small body weights and small changes that matter at this age.

Spread the washable sheet on the scale for the child’s comfort, place the baby in the centre and read the weight on the LCD. The same health worker can then use the height tape meter to take length or height, so both growth measurements are recorded in one sitting, while the auto-off function saves battery between children.

What to Specify When Ordering

- The number of scales needed for each clinic, health post or outreach team.
- That each scale should come with its height tape meter and washable sheet.
- Whether older children and adults will also be weighed, in which case add the Scale for Adults with Height Rod.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, supplies this children’s scale to paediatric clinics, maternal and child health programmes, NGOs, institutions and dealers. The scale is a sourced item; ScienceLab’s role is to quote it, pack it and dispatch it toget
