Description :

Pipet Pump II (Product Code: SLE/ME/19) is a hand-operated pipet pump used to fill and dispense 10 mL pipets without mouth pipetting in school and college laboratories. This green 10 mL model has a fast-release action, so once the measured volume has been delivered to the mark, any remaining liquid can be let out quickly before the next transfer. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India.

Key Details

Parameter	Detail
Type	Fast-release pipet pump
Pipet size	10 mL
Colour	Green
Product code	SLE/ME/19
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Pipet Pump Used For?

A pipet pump gives students precise, controlled suction for measuring out a fixed volume, such as 10 mL of an acid for a titration or of a stock solution for a dilution. Fit the upper end of a 10 mL pipet into the pump, draw the liquid slightly above the graduation mark, then let it down slowly until the meniscus sits on the line before transferring it to the flask. It is a staple of any volumetric analysis kit in school and college chemistry.

The fast-release feature saves time when many samples are measured in a lesson. Keep the pump upright while it holds liquid, never let solution reach the pump itself, and wipe the outside after use. Its green colour also makes it easy to pick out on a crowded bench when pumps for other pipet sizes are in use.

Supplier

Jain Scientific Equipments Private Limited, the company behind the ScienceLab name in Ambala, Haryana, supplies the Pipet Pump II to schools, colleges, training institutes and dealers in India and international markets. Laboratories often order it with pipets and pipette stands so each titration station is complete. Learn more on the ScienceLab profile.

Related Measuring Equipment

Other pipet-filling options and accessories:

- Pipette Filler – 10ml — another filler in the same 10 mL size.
- Safety Pipet Filler, Silicone — a solvent-resistant filler that adjusts to any pipet size.
- Pipet Aid — a basic squeeze-bulb alternative for junior classes.
