Description :

Pipet Aid (Product Code: SLE/ME/21) is a simple, economical squeeze-bulb device used to draw liquid into a pipet as a safe and easy alternative to mouth pipetting in school laboratories. It pairsa vinyl bulb with a tapered polyethylene chuck that lets the filled pipet be pulled free quickly, after which a fingertip over the pipet end controls the release. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Bulb	Vinyl; squeeze to draw fluid into the pipet
Chuck	Tapered polyethylene, for quick removal once the pipet is filled
Dispensing	Pipet removed; release controlled with a finger over the pipet end
Purpose	Economical, safe alternative to mouth pipetting
Product code	SLE/ME/21
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Pipet Aid Used For?

The Pipet Aid is a straightforward way to stop students pipetting by mouth. It is used in junior science lab equipment sets and first chemistry practicals where learners measure out water, dilute acids or indicator solutions, and it teaches the classic fingertip technique of holding a liquid column and letting it down to the mark.

Squeeze the vinyl bulb, fit the pipet into the tapered chuck and release the bulb gently so fluid rises past the graduation. Pull the pipet free, cap its upper end with a dry fingertip, and ease the pressure to lower the meniscus to the line before delivering the liquid. Keep solution out of the bulb, and for one-handed dispensing or solvent work move students on to a silicone safety filler.

Supplier

Jain Scientific Equipments Private Limited supplies the Pipet Aid under the ScienceLab trading name from Ambala, Haryana, to schools, colleges, teacher-training centres and dealers in India and international markets. As an economical way to equip a whole class, it is often quoted alongside pipets and rotary stands for new science rooms. See the ScienceLab profile for company details.

Related Measuring Equipment

Step-up options and accessories for pipetting lessons:

- Safety Pipet Filler, Silicone — one-hand filling and dispensing, resistant to organic solvents.
- Pipet Pump II — fast-release pump for 10 mL pipets.
- Pipet Controller — cordless two-speed controller for 1 to 100 mL pipets.
