Description :

Fiberglass Tape Measure (Product Code: SLE/ME/28) is a flexible 150 cm measuring tape used to measure curved surfaces, circumferences and body dimensions in biology, physics and maths classes. Its high-strength tape has heat-sealed markings that resist fading, with millimetre graduations on one side and 0.5 cm divisions with coloured decimetre marks on the other. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a school laboratory equipment supplier in India.

Specifications

Parameter	Detail
Length	150 cm
Tape	High-strength fiberglass with heat-sealed markings
Side one	Graduated in millimetres with 0.5 cm markings; horizontal readout
Side two	Graduated in 0.5 cm with coloured decimetre markings; vertical readout
Product code	SLE/ME/28
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Fiberglass Tape Measure Used For?

A flexible tape follows curves where a rigid ruler cannot. Classes use it to find the circumference of a cylinder or ball when estimating pi, to record the girth of tree trunks in ecology fieldwork, and to take head, wrist or arm-span measurements in human variation practicals that are a regular part of school biology lab work. It is equally handy for measuring the length of a curved track or the outline of a leaf.

The two readouts suit different jobs: the horizontal millimetre side is easy to read along a bench, while the vertical side with coloured decimetre marks is convenient when the tape runs upright and helps younger students count in tens. Keep the tape snug but not pulled hard, start from the zero end, and wind it loosely after use so it does not kink.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, supplies this fiberglass tape as part of a wider measuring range for schools, colleges and dealers in India and international markets. It can be ordered together with rulers, metre sticks and trundle wheels in one enquiry. Company details are on the ScienceLab profile.

Related Measuring Equipment

Other tools for measuring length and distance:

- Windup Meter Tapes — longer fiberglass tapes for outdoor distances.
- Tape Measure, 5 m, Retractable — a retractable tape for room and equipment
