Description :

Indoor/Outdoor Thermometer (Product Code: SLE/ME/38) is a dual-reading thermometer used to monitor inside and outside air temperatures from within a classroom, laboratory or school weather corner. Teachers and students read both temperatures from indoors on the same °C and °F scales, which run from -55 to 55 °C and -50 to 130 °F. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its junior science lab equipment range.

Specifications

Parameter	Detail
Celsius range	-55 to 55 °C
Fahrenheit range	-50 to 130 °F
Readings	Outside and inside temperatures, both read from inside
Scales	The same °C and °F scales serve both readings
Size	2 1/4 × 9 in (H)
Product code	SLE/ME/38
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is an Indoor/Outdoor Thermometer Used For?

Comparing the two readings side by side gives pupils a real data set every day. A class can log the outdoor temperature at the same time each morning, plot it across a month or a season, and set it against the room temperature to discuss insulation, ventilation and how sunshine warms a building. Because both values share one dual scale, the thermometer is also a handy prompt for practising conversion between Celsius and Fahrenheit.

Site it so that the outdoor reading is taken in shade, away from walls and paving that store the sun's heat, and keep the indoor side clear of heaters, air-conditioner outlets and direct sunlight. Read at eye level and write the time beside every value, so that records made by different groups or on different days can be compared fairly.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited of Ambala, Haryana, which supplies this Indoor/Outdoor Thermometer to schools, colleges, laboratories and dealers in India and international markets. As a school laboratory equipment supplier in India, the company can include it in a wider quotation that covers thermometers, balances and other measuring instruments. More about the company is on the ScienceLab profile.
