Description :

Dish Balance with Weight Number (Product Code: SLE/MAT/63) is a durable plastic two-pan balance used by children to measure and compare weights in primary maths and early science lessons. It comes with a set of bear family weights and weighted numbers 1 to 9 in 2 colours, so pupils can see what they are measuring and relate what they observe to the measured result. **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and school laboratory equipment supplier in India, makes it at its own factory in Ambala.

Specifications

Parameter	Detail
Material	Durable plastic
Pans	2 pans with hanger
Bear family weights	Set provided, listed as 3 g – 6 pcs; 6 g, 9 g and 12 g – 2 pcs each
Weighted numbers	1, 2, 3, 4, 5, 6 – 4 pcs each; 7, 8, 9 – 2 pcs each; in 2 colours
Learning objective	Measuring and comparing weights; relating visual and measured observation
Product code	SLE/MAT/63
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Dish Balance with Weight Number Used For?

Children start by predicting which side will go down, then test it: a bear on one pan, two smaller bears on the other, and the class describes the result as heavier, lighter or equal. Because the dishes are open, every child can see what is being compared, which makes the step from "looks bigger" to "weighs more" much clearer.

The weighted numbers take the balance into early number work. Teachers typically ask pupils to place 3 and 4 on one pan and 7 on the other and test whether the sides balance, which turns addition and missing-number problems into something physical. Check that the balance sits level with empty pans before each activity. It makes a practical addition to mathematics lab kits in India for primary classes.

OEM Manufacturer

ScienceLab is the brand under which Jain Scientific Equipments Private Limited makes the Dish Balance with Weight Number as its OEM (original equipment manufacturer). The balance and its accessories are produced at the company's own licensed factory at Saha, Ambala, Haryana, India, and reach schools, dealers and importers without a trading intermediary. If a weight or number piece goes missing, ask the manufacturer directly about a replacement. More on our company profile.
