Product Name :

2D Shapes

Product Code :

SLE/MAT/74

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

2D Shapes (Product Code: SLE/MAT/74) is a shape-matching teaching aid used to introduce two-dimensional geometry — shape names, properties and construction — to young children in pre-primary and primary classrooms. Teachers use it for play-way activities in which learners match and fit the right shapes, making an early geometry topic hands-on. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Topic	Two-dimensional (plane) shapes
Activity	Matching and fixing the right shapes
Learning outcomes	Shape names and properties; understanding how shapes are constructed
Teaching approach	Hands-on, play-way learning for young children
Contents and material	Not listed in the product description — ask us for details
Product code	SLE/MAT/74
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 2D Shapes Set Used For?

Young children learn shapes fastest when they can hold them. With this set, a teacher names a shape, asks a child to find it and fit it into place, then talks about what makes it that shape — how many sides, how many corners, straight edges or curved. Matching tasks like these turn a vital early maths topic into a game little learners want to repeat.

Once the names are secure, the same pieces support sorting by property, simple pattern-making and discussion of how a shape is built from its sides and corners. Short, frequent sessions in small groups suit pre-primary and early primary classes, and the set leads naturally on to shape templates and pattern blocks in later years.

OEM Manufacturer

The 2D Shapes set is manufactured by ScienceLab — the brand of Jain Scientific Equipments Private Limited — acting as OEM (original equipment manufacturer). It is produced at the company's licensed factory in Saha, Ambala, Haryana, India, and supplied straight from the factory to pre-schools, primary schools, teacher-training colleges, dealers and importers. For matching items or repeat sets for more classrooms, ask us and the manufacturer will respond directly. Learn more on the company profile.
