Product Name :

Double Sided Geoboard

Product Code :

SLE/MAT/77

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Double Sided Geoboard (Product Code: SLE/MAT/77) is a plastic pin board used with rubber bands to explore shapes, area, perimeter, symmetry, angles and coordinates in school maths lessons. Its distinguishing feature is two layouts in one board — an 11 x 11 pin grid on one side and a 24-pin circular pattern on the other — so a class can move from grid work to circlegeometry without changing equipment. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Material	Plastic
Side one	11 x 11 pin grid
Side two	24-pin circular pattern
Used with	Rubber bands (inclusion not stated — ask us)
Topics	Shapes, designs, spatial relationships, angles, fractions, area, perimeter, symmetry, coordinates
Product code	SLE/MAT/77
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Double Sided Geoboard Used For?

Stretching rubber bands between pins lets pupils draw shapes they can change instantly. On the square side, the 11 x 11 grid supports counting-unit area and perimeter, reflection across a line of symmetry and plotting points as coordinates. A favourite task is the area of a triangle: pupils complete the triangle into a rectangle, see that it is half of that rectangle, and then verify the answer with the formula.

Turn the board over and the 24-pin circular pattern opens up circle work — chords, regular polygons whose corners sit on the circle, angles and fractions of a circle. Having both layouts on one board saves storage space in a school maths lab and keeps each pupil working on the same familiar tool throughout a geometry unit.

What to Specify When Ordering

- Number of boards — one per pupil or one per pair is common for class work.
- Whether rubber bands should be quoted along with the boards.
- Any single-layout geoboards (isometric or assorted) needed for the same lab.
