Description :

Pipette Stand (Product Code: SLE/CH/17) is a polished beech wood rest that holds up to 12 pipettes lying horizontally, six on each side, so clean pipettes stay off the bench and their tipsstay uncontaminated between readings. It is aimed at chemistry teachers, lab technicians andstudents who carry out repeated measurements with volumetric or graduated pipettes. The standis made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and forms part of ourchemistry lab equipment for schools and colleges in India and overseas.

Specifications

Parameter	Detail
Type	Horizontal pipette stand
Material	Beech wood, well polished
Capacity	Up to 12 pipettes
Arrangement	Pipettes rest horizontally, 6 on each side

Typical Use

During volumetric analysis a pipette is picked up and put down many times — to rinse it, draw the aliquot, deliver it into the flask and repeat for concordant readings. Laying it flat on the benchrisks rolling, breakage and a dirty tip. This stand gives each pipette a fixed horizontal place, and with six positions per side, two students or two groups can share one stand from opposite sides of a bench.

Horizontal storage also stops liquid left in the pipette from running into the bulb or the pipette filler. Label each position for a particular volume or reagent so pipettes are not mixed up between solutions, and wipe the polished wood dry if a drop is spilled on it.

Manufacturer

The stand is produced by **Jain Scientific Equipments Private Limited**, which operates under the **ScienceLab** name from Ambala, Haryana. The company is a registered MSME enterprise (Udyam UDYAM-HR-01-0003714), and its export consignments move under Importer-Exporter Code AAECJ8618A issued by the DGFT. Visit our company profile for background on the business.

Related Chemistry Lab Equipment

Other pipetting items used in the same titration workflow:

- Pipette Stand Foldable — holds pipettes upright and folds away when not in use
- Pipette Filler — draws liquid into the pipette without mouth pipetting
- Bulb Type, Pipette Filler — a simple squeeze-bulb option for student use
- Pipette Stand, Vertical — an upright alternative where drainage is preferred
