Description :

Pipette Stand Foldable (Product Code: SLE/CH/18) is a wooden stand that holds up to 12 pipettes upright, accepting stems from 6 mm to 12 mm in diameter, and folds down when the session is over. Made from well-polished beech wood, it suits laboratories where bench and cupboard space is tight, such as shared school labs and mobile teaching setups. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, alongside our wider glassware and support range of chemistry lab equipment in India.

Specifications

Parameter	Detail
Type	Foldable vertical pipette stand
Material	Beech wood, well polished
Capacity	Up to 12 pipettes, held vertically
Pipette diameter	6 mm to 12 mm
Storage	Folds easily when not in use

Typical Use

Holding pipettes vertically lets rinse water and reagent traces drain downward after washing, so pipettes are ready for the next titration practical rather than left lying wet on a tray. Twelve places are enough for a group to keep separate pipettes for acid, base and standard solutions, each in its own marked slot, which cuts down on cross-contamination in volumetric work.

The folding design is the practical difference from a fixed stand. At the end of the period the stand can be emptied, folded and slid into a drawer or lab kit box, making it handy for labs that are set up and packed away daily or for teachers who carry apparatus between classrooms. Check that each pipette falls within the 6–12 mm range so it sits securely.

Manufacturer

ScienceLab is the trading name of **Jain Scientific Equipments Private Limited**, an Ambala, Haryana company that makes educational and laboratory apparatus. Find out more on our company profile page.

Related Chemistry Lab Equipment

Items that pair with a vertical pipette stand:

- Pipette Stand — a fixed beech wood stand that rests 12 pipettes horizontally
- Pipette Controller — controlled aspiration and dispensing for repeated measurements
- Pipette Carousel Stand — a rotating option for storing pipettes on a central bench
- Pipette Stand, Polypropylene — a plastic alternative for wet or chemical-heavy areas
