Description :

Burette Rack (Product Code: SLE/CH/19) is a tiered storage frame in polished beech wood that keeps up to 13 burettes standing upright in vertical recesses along one side of its upper tier. It gives lab staff a single, orderly place to park a whole class set of burettes between titration sessions instead of laying them in drawers where stopcocks and tips get chipped. The rack is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and belongs to our chemistry lab equipment for schools, colleges and quality-control labs in India and abroad.

Specifications

Parameter	Detail
Type	Multi-burette storage rack
Construction	Tiered wooden frame
Material	Polished beech wood
Burette holding	Vertical recesses on one side of the upper tier
Capacity	Up to 13 burettes

Typical Use

Burettes are long, fragile and easily damaged at the jet and stopcock. A rack like this is kept on a side bench or near the sink: after a titration class, students rinse their burettes and return them to the recesses, where they stand vertically and drain. At the start of the next volumetric analysis practical, the technician can see at a glance that all burettes are present and clean before handing them out to be mounted on a burette stand.

With capacity for 13, one rack covers a typical group practical. Because the recesses run along a single side, place the rack with that side facing the user so burettes can be lifted out without reaching across others. Keep the rack away from direct burner heat and wipe the polished wood if reagents drip onto it.

Manufacturer

This rack is manufactured by **Jain Scientific Equipments Private Limited**, known in the market as **ScienceLab** and based in Ambala, Haryana, India. Our company profile explains more about the company.

Related Chemistry Lab Equipment

Equipment that belongs to the same titration setup:

- Burette — the graduated glass tube the rack is designed to store
- Burette, Class-B, with PTFE Key Stopcock — a burette option with a non-greased PTFE key
- Brush Burette — a long brush for cleaning burettes before they go back on the rack
- Burette Stand and Funnel Stand — holds the burette in position during the titration itself
