Description :

Bottle Stand (Product Code: SLE/CH/22) is a polished beech wood holder with 45 mm diameter holes sized for 60 ml dropping bottles, supplied in a 6-hole or a 12-hole version. It keeps a bench set of indicators and test reagents upright, together and in a fixed order, so bottles are not knocked over or mixed up during practicals. The stand is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for school chemistry lab equipment sets andcollege teaching labs.

Specifications

Parameter	Detail
Type	Reagent / dropping bottle stand
Material	Beech wood, well polished
Hole diameter	45 mm
Suitable bottles	60 ml dropping bottles
Versions	6 holes or 12 holes

Typical Use

A bottle stand turns a loose collection of reagent bottles into an organised bench kit. Teachers typically fill a 6-hole stand with the essentials for acid-base indicator work — phenolphthalein, methyl orange, litmus and universal indicator — and a 12-hole stand with the wider range of test solutions used in salt analysis or food tests. Each group gets an identical stand, which makes it easy to check that every bottle has come back at the end of the lesson.

Keeping bottles in fixed positions also helps students find the right reagent quickly and reduces the chance of dropper mix-ups. Write the reagent name on the wood beside each hole or on a strip along the edge, wipe up drips so stains do not build up on the polish, and store the stand away from heat sources.

Manufacturer

The Bottle Stand is made by **Jain Scientific Equipments Private Limited**, a laboratory apparatus maker based in Ambala, Haryana, whose products are sold under the **ScienceLab** name. Read our company profile to learn more.

Related Chemistry Lab Equipment

Bottles and related items for filling the stand:

- Bottle Dropping — glass dropping bottles for indicators and test reagents
- Amber Dropping Bottle — for light-sensitive solutions such as silver nitrate
- Dropping Bottle — a plastic option for less breakable student sets
- Bottle Reagent, W.M. Glass — stock bottles for refilling the dropping bottles
