Description :

Glass Spirit Lamp (Product Code: SLE/CH/32) is a glass-bodied burner with a brass wick holder and a glass top cover, giving a small, steady flame from methylated spirit or alcohol. It is the go-to heat source for classrooms without a gas line, for flaming inoculating loops in biology, and for gentle warming of test tubes in junior science lab equipment sets. The lamp is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, alongside its wider range of chemistry lab glassware for schools in India and international markets.

Specifications

Parameter	Detail
Body	Glass
Wick holder	Brass
Cover	Glass top cover
Capacity	60 ml; 125 ml

Typical Use

Students use the spirit lamp to warm small quantities of liquid in a test tube held with a holder, to dry a glass slide, or to sterilise a wire loop before and after transferring a culture. Because it needs no gas supply or tubing, it is easy to set out on every bench for a practical and to pack away afterwards; the 60 ml lamp suits short class sessions, while the 125 ml size runs longer between refills.

Fill the lamp away from any flame and do not overfill it. Keep the wick trimmed level so the flame burns evenly without smoking, and put the flame out by placing the glass top cover over it rather than blowing on it. The cover also stops the spirit from evaporating between lessons. Never refill a lamp that is still lit or warm.

Manufacturer

ScienceLab is the brand name used by Jain Scientific Equipments Private Limited of Ambala, Haryana, a maker of laboratory glassware, heating apparatus and school science equipment. Visit the company profile for more about the business.

Related Chemistry Lab Equipment

Accessories and alternatives that go with a spirit lamp:

- Wicks For Glass Spirit Burner — replacement wicks when the old one chars or shortens.
- Methylated Spirit — the usual fuel for the lamp.
- Test Tube Holder — holds the tube safely over the flame.
- Bunsen Burner — a hotter gas-fired option where a gas supply is available.

Other heating and support items are in Chemistry Lab Equipment.
